

Is your data creating inefficiencies, security risks, and inconsistent insights?

It's time to make your data work for your business – not against it.

In today's data-driven world, fragmented data systems and siloed analytics create inefficiencies, security risks, and inconsistent insights. Without a unified approach, businesses struggle with data duplication, governance challenges, and unreliable AI models due to poor data quality.

Nortal uses Microsoft Fabric to help unify data and analytics into a single platform, allowing integration of any volume of data without latency or performance concerns, and to create data platforms for data and AI solutions.

Microsoft Fabric Assessment

Evaluate if Microsoft Fabric is right for your organization with Nortal's 2–4-week Fabric assessment.

Customized Roadmap – A step-by-step plan to integrate Fabric, improve data strategies, and accelerate AI adoption.

Cost Estimates – A prioritized approach with cost estimates to help you optimize investments.

Enterprise Architecture Alignment – Insights into how Fabric fits your overall EA landscape and streamlines your data governance.

AI & ML Enablement – Recommendations on how Fabric can boost your AI programs and serve as the foundation for Enterprise AI Agents.

Microsoft Fabric Kick-Start

Nortal's 8-week Kick-Start offering allows you to evaluate Fabric using your own real-world use case.

Fabric Environment Setup – A fully configured Fabric environment and workspaces tailored to your organization.

First Use Case – Data pipelines from selected source systems and a BI report or AI agent POC to provide the platform works for you.

Data Modeling – Aligning Fabric according to your architecture base, such as medallion architecture (Bronze, Silver, Gold data layers).

Solution Training & Documentation – Hands-on training and documentation to ensure your team is equipped to move forward.

65%

Survey respondents say they are using generative AI in at least one business function

75%

of enterprise software engineers will use AI code assistants by 2028 according to Gartner, Inc.

60–70%

of employee time could be freed by using generative AI to automate work activities

AI is only as good as the data it's trained on...

Why Nortal?

Nortal, a Fabric Featured Partner, is a global leader in digital transformation, delivering mission-critical solutions for organizations and governments worldwide. With deep expertise in data unification, security, and AI-driven innovation, Nortal empowers businesses to maximize the full potential of Microsoft Fabric, ensuring seamless integration, governance, and scalability.

- Extensive experience building mission-critical Azure based data platforms and workloads across the globe.
- A Global Launch Partner and an early adapter of Microsoft Fabric and have been working with it before it was released to the public.
- Nortal is a Fabric Featured Partner and with direct access to the Microsoft's product team.

Fabric Customer Stories

Transforming Data Visibility for a Global Energy Leader

True Global Visibility – Unified data across all regions for real-time decision making

Smarter Insights, Faster Decisions – Enabled predictive analytics for purchasing & forecasting

Seamless Data Integration – Successfully migrated and scaled 10+ additional data sources

Enterprise-Grade Governance – Secure, compliant, and future-proof data management

Driving Digital Transformation for a Global Sustainable Packaging Leader

Global IT & Business Integration – Ensured seamless expansion of new production lines

Scalable & Secure Operations – Built a foundation for future-proof IT/OT infrastructure

Long-Term Strategic Partnership – Positioned Nortal as a trusted innovation partner

Roadmap for 2024 & Beyond – Leading multiple development tracks for sustainable growth
